

ANTI-UV PRODUCT

ELETTROCANALI TP18 serie is a pliable conduit system made with anti-UV additives that make the conduit suitable for external use and sun exposition.

After internal laboratory tests we can estimate that the conduit system maintain his characteristic for more than 15 years at exposition typical on south Europe.

Charts below shows as color and gloss of conduit is stable on Anti UV product, at the contrary in standard conduit with no anti UV additives we have degradation and loss of mechanical characteristics.
